ROSENTILE
PORCELAIN

Organic architecture is an architectural philosophy and style that promotes harmony between human habitation and the natural world by integrating buildings into their surroundings through natural, locally-sourced materials and flowing, non-artificial forms. Key characteristics include sustainability, respect for nature, a balance of form and function, and the use of curves rather than rigid straight lines to mimic natural structures. Frank Lloyd Wright, a pioneer of the style, famously stated that a house "should be of the hill," embodying a deep connection to its site. The fundamental principle is to create structures that do not dominate the landscape but rather emerge from it and become part of it. Organic architecture favors the use of raw, locally-sourced materials like wood and stone to promote sustainability and blend with the environment. Buildings often feature flowing lines and curves, inspired by natural shapes, to create a softer, more integrated aesthetic rather than relying on rigid, geometric forms. The philosophy emphasizes balance and sustainability, with buildings designed to work with their natural environment and often incorporating renewable energy sources and natural ventilation.

Technical Information

ROSENTILE

WHERE SURFACE MEETS SOUL

Tile Class	Porcelain polishing with low water absorption Bla ≤ 0.5
Abransion Resistance	Class 2
Water Absorption	Bla ≤ 0.5
Bending Strength	36 $\frac{N}{mm^2}$ ≤
Stain Resistance	Class 3
Thickness	11 mm
Kind of Tile	Glazed floor and wall
Indication	Indoor & Outdoor Resistant to frost and heat
Effect	Polished - Matt - Sugar

Tile class	Porcelain Nano Polish
Abrasion Resistance	Class 2
Water Absorption	Bla ≤ 0.5
Bending strength	40 $\frac{N}{mm^2}$ ≤
Stain resistance	Class 3
Thichness	11 mm ± 0.5
Kind Of Tile	Glazed floor and wall
Indications	Indoor & Outdoor Resistant to frost and heat
Effect	Nano Polish Matt (Hard-Soft-Satin) - Sugar
Size	60 x 60 (Thickness 2 cm.) , 80 x 80 , 120 x 60 , 100 x 100 , 160 x 80
weight	80 x 80 ⟶ 15 Kg
